Synopsis

```
use Pod::Render;
my Pod::Render $pr .= new;
$pr.render(
  'html', 'my-excellent-pod-document.pod6', 'ny-dir/my-html-result.html'
);
```

Methods

render

```
multi method render ( 'html', Str:D $pod-file, Str $html-file )
multi method render ( 'pdf', Str:D $pod-file, Str $pdf-file )
multi method render ( 'md', Str:D $pod-file, Str $md-file )
```

Render the document given by `$pod-file` to one of the output formats html, pdf or markdown. To generate pdf the program `prince` is used so that program must be installed.
